

What is claimed is

1. An electronic device comprising a battery storing
container having an opening for placing a battery in and out,
5 a recording medium storing part for storing a recording medium
detachably and a plurality of circuit boards constituting
predetermined circuits, wherein

said recording medium storing part and said plurality
of circuit boards are placed so as to surround the outside
10 of said battery storing container except at said opening.

2. The electronic device according to claim 1, wherein one
of said circuit boards is an image display unit.

15 3. The electronic device according to claim 1, wherein said
battery storing container comprises six external planes
forming the outside thereof, said opening is made in a first
external plane, said recording medium storing part is disposed
in a second external plane which is perpendicular to said first
20 external plane, said circuit boards comprising an image display
unit is disposed in a third external plane which is parallel
to said second external plane and said circuit boards other
than said image display unit are disposed in other three
external planes other than said first to third external planes.
